

LINDAMOOD PHONEME SEQUENCING® (LiPS®)

for Phonemic Awareness, Reading and Spelling

JOIN US for a highly interactive, three-day introductory workshop. Our experienced Professional Development Presenters will instruct you in the steps of the LiPS® program.

LiPS® develops phonemic awareness. Students learn to recognize how their mouths produce the sounds of language. This kinesthetic feedback enables reading, spelling, and speech.

Participants will learn the role of phonemic awareness in:

1. tracking sounds and letters within words,
2. decoding,
3. spelling, and
4. development of fluency in contextual reading.
